ALABAMA DEPARTMENT OF WORKFORCE

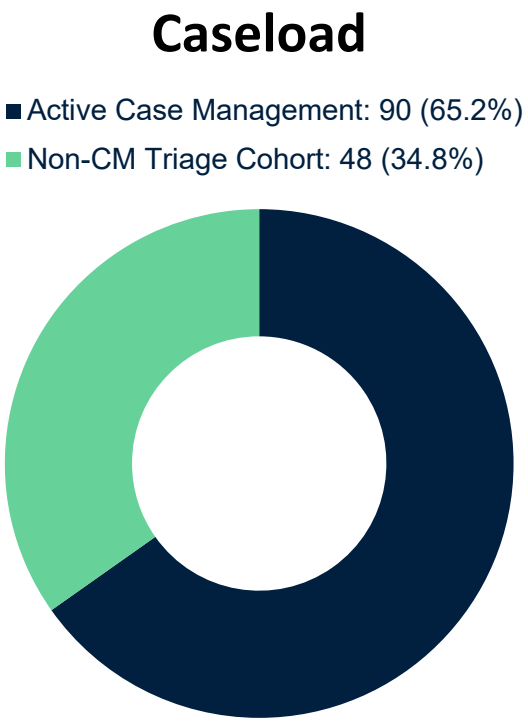

Services for Non-CM Veterans

Best Practices for Intake Triage, Tracking, and AI Transition

Keith Battle, Workforce Specialist – Veteran Services
Mobile Career Center
Statewide JVSG Training | Montgomery 2026

workforce.alabama.gov

THE Q4 VELOCITY PROOF (ACTIVE SURGE)

• 83.3% of Non-CM Cohort (40 of 48) assessed July–Sept 2026
• 70.8% Virtual/Online | 16.7% Ex-Offenders (Complex Re-Entry)

STATEWIDE MULTIPLIER

Across Alabama's 30 DVOPs: 1,200 to 1,500 triage veterans sit unmonitored.

MOBILE FY 2026 CASELOAD BASELINE

Over 1 in 3 Assessed Veterans Are Non-CM

- **Active Triage Pipeline:** 48 of 138 assessed veterans (34.8%) have no IEP, representing an active pre-case management cohort.
- **Recent Assessment Surge:** 40 of 48 veterans (83.3%) were assessed in Q4, requiring structured 14- to 30-day barrier stabilization.
- **Statewide Multiplier:** 48 invisible cases in Mobile equals 1,200 to 1,500 unmonitored triage veterans statewide each year.

USDOL OCCUPATIONAL MATCHING PILOT

Stability Factors Live Only in Case Notes

Workforce Alabama

Perfect Skills Match

- **Military Alignment:** Automated AI mapped combat arms MOS cleanly to security and warehouse maintenance.
- **Superficial Readiness:** Job-matching algorithms assumed placement readiness based solely on occupational codes.

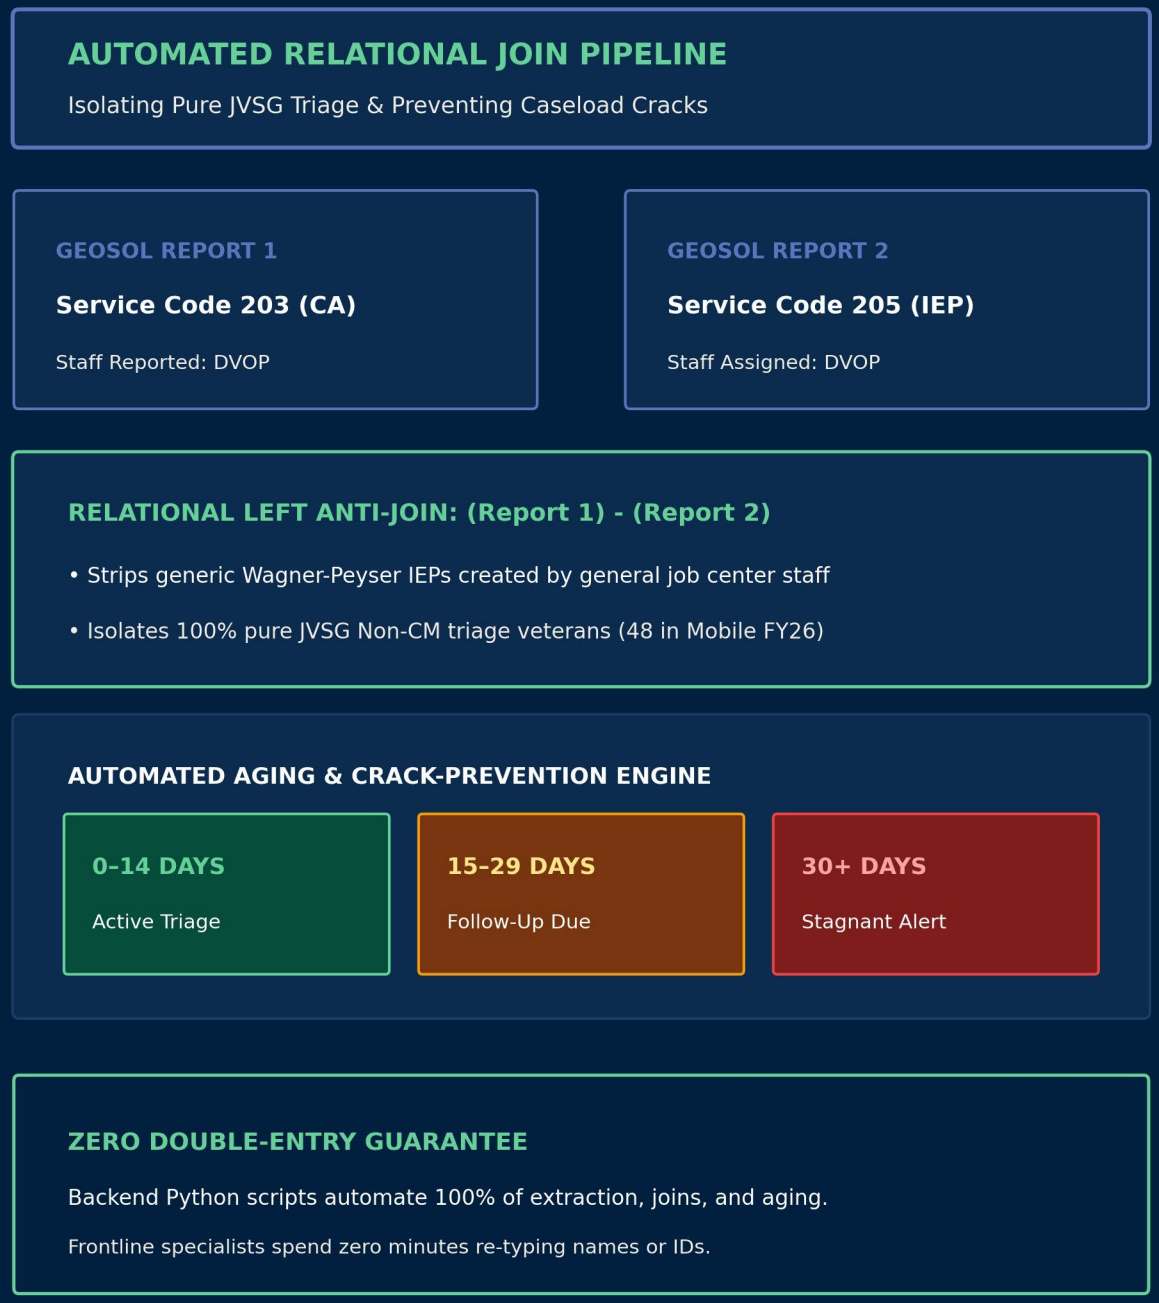

Critical Blindspot

- **Transit Dependency:** Veteran relies exclusively on a $0.60 reduced-fare municipal Wave Transit bus pass.
- **Shift Incompatibility:** Bus route stops at 21:00, making 2nd and 3rd shift placements an immediate failure.

Missing Stability Factors

- **Transitional Housing:** Resident at Waterfront Rescue Mission / Eagle's Landing with a strict 22:00 curfew.
- **Unstructured Reality:** 100% of these critical operational boundaries lived only in unstructured narrative notes.

ENTERPRISE DATA ARCHITECTURE

Automated Joins with Zero Double-Entry

- **The Dual-Report Anti-Join:** Anti-join Code 203 (Staff Reported: DVOP) against Code 205 (Staff Assigned: DVOP) to eliminate Wagner-Peyser noise.
- **Familiar VR&E Model:** Hosted in secure M365 SharePoint, mirroring our existing Chapter 31 workbook with Career Center slicers.
- **Automated Contact Velocity:** Backend formulas calculate days idle, tagging cases Green (<15d), Yellow (15-29d), or Red (30d+ alert).

Architecture: Automated Python Batch Extraction synced to Department M365

M365 CLOUD WATCHLIST WALKTHROUGH

Operationalizing the Tracker: Live Interface

- **Dedicated Office Slicers:** Filter instantly by Career Center, Priority code, and Alert status to see your active local triage cohort.
- **Frontline Zero Double-Entry:** Client names, State IDs, and assessment dates auto-populate directly from GeoSol report joins.
- **Dynamic Velocity Triggers:** Built-in formulas calculate days idle and flag Green, Yellow, and Red follow-up deadlines automatically.

Demonstration: Interactive Cloud Workbook deployed on Alabama Department of Workforce M365

HIGH-VOLUME DVOP / LVER COORDINATION

The 30-Second Operational Handoff

Workforce Alabama

High-Volume Bottleneck

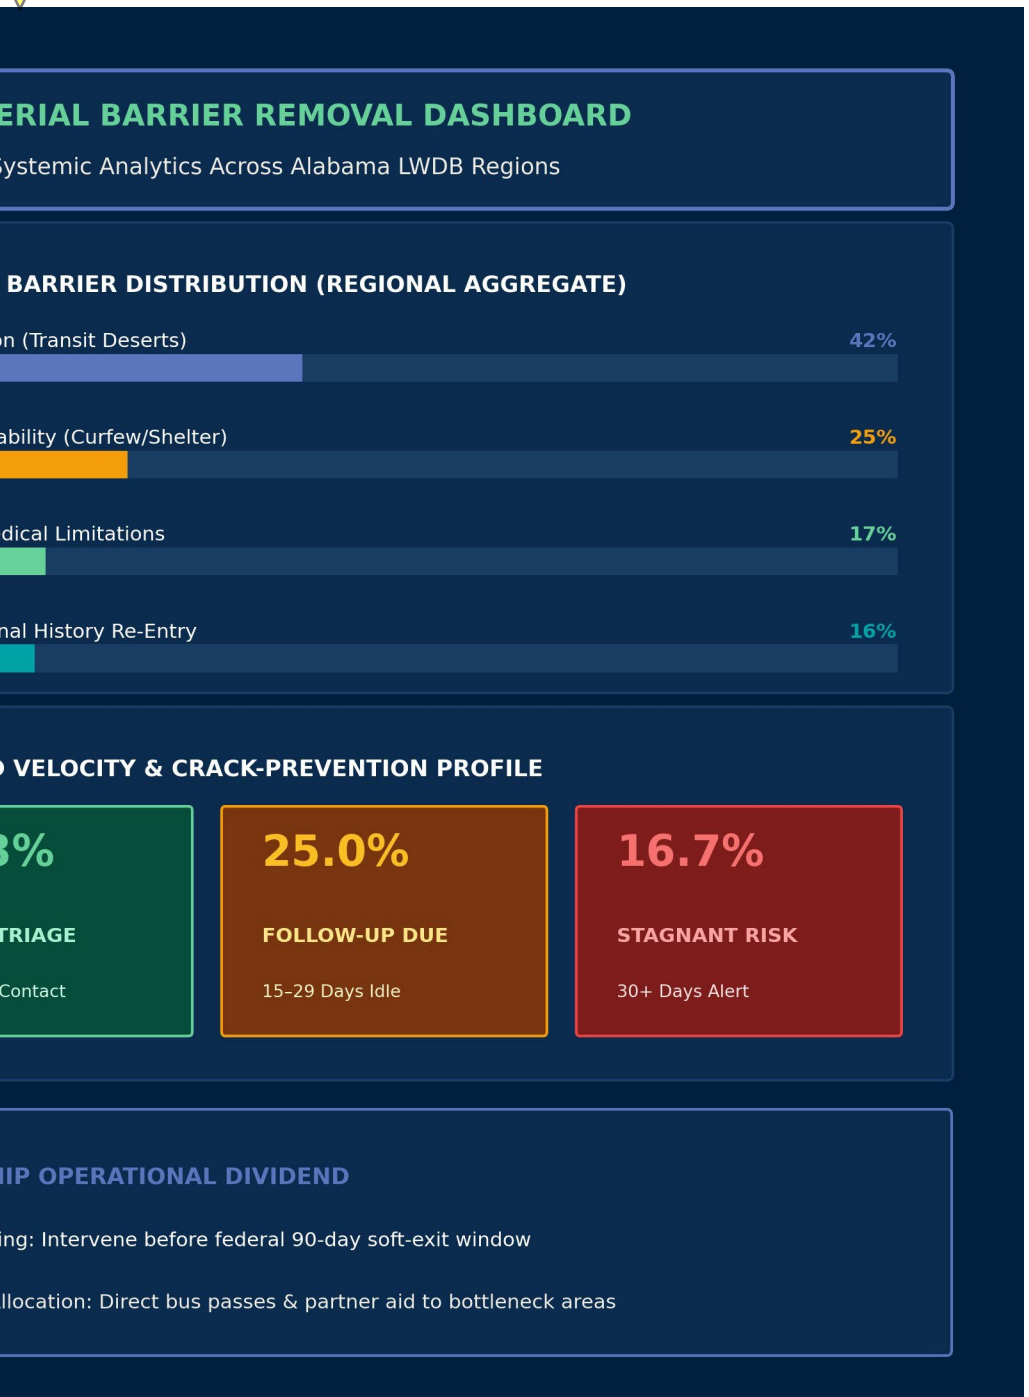

- **Information Overload:** Specialists manage intense caseloads; reading 5-page narrative case notes stalls referrals.
- **Communication Gap:** LVERs lack fast visibility into non-IEP veterans ready for immediate job placement advocacy.

1-Line Operational Filter

- **Actionable Synthesis:** Converts complex notes into plain-text constraints: 'Shift End < 2030 hrs; Wave Transit'.
- **Instant Clarity:** Surfaces exact operational parameters in Column M without opening multiple MIS windows.

Targeted Placement

- **Specialized Advocacy:** LVERs match job orders to verified boundaries without risking Day-One placement failure.
- **Seamless Handoff:** Mitigated veterans transition straight to employer referral while active barriers stabilize.

MANAGERIAL OVERSIGHT & DIAGNOSTICS

Systemic Barrier Visibility for Leadership

- **Real-Time Barrier Diagnostics:** Aggregates transportation deserts, housing deficits, and legal barriers across all 7 Alabama LWDB regions.
- **Proactive Crack Prevention:** Identifies stagnating veterans at 15–29 days before hitting the federal 90-day soft-exit window.
- **Strategic Resource Deployment:** Directs supportive service funds, bus passes, and partner agreements to high-need Career Centers.

NROLLED BARRIER REMOVAL NETWORKS

ommunity Partner Ecosystem Integration

Workforce Alabama

ousing & Recovery

Alethia House: Coordinates substance abuse recovery, transitional housing, and supportive employment.

Waterfront Rescue: Provides emergency shelter, Day-One stabilization, and structured sobriety program intake.

Transit & Rehabilitation

- **SAAHEC & Municipal Bus:** Secures subsidized transit passes and verifies route schedules for day-shift alignment.
- **ADRS & Assistive Tech:** Alabama Dept of Rehab Services sponsors tuition, credentials, and medical accommodations.

Structured Follow-Up

- **The Triage Window:** Tracks veterans during the 14- to 60-day stabilization window while awaiting partner intake.
- **Zero Lost Referrals:** Ensures co-enrolled veterans do not vanish from workforce radar before IEP enrollment.

NTLINE CASEWORK STANDARDS

ne 4 Operational Barrier States

Workforce Alabama

tical

ndition: Severe active sis (unsheltered, acute dical or legal barrier).

tion: Hold on Non-CM tchlist; connect to ergency partner bilization.

Active

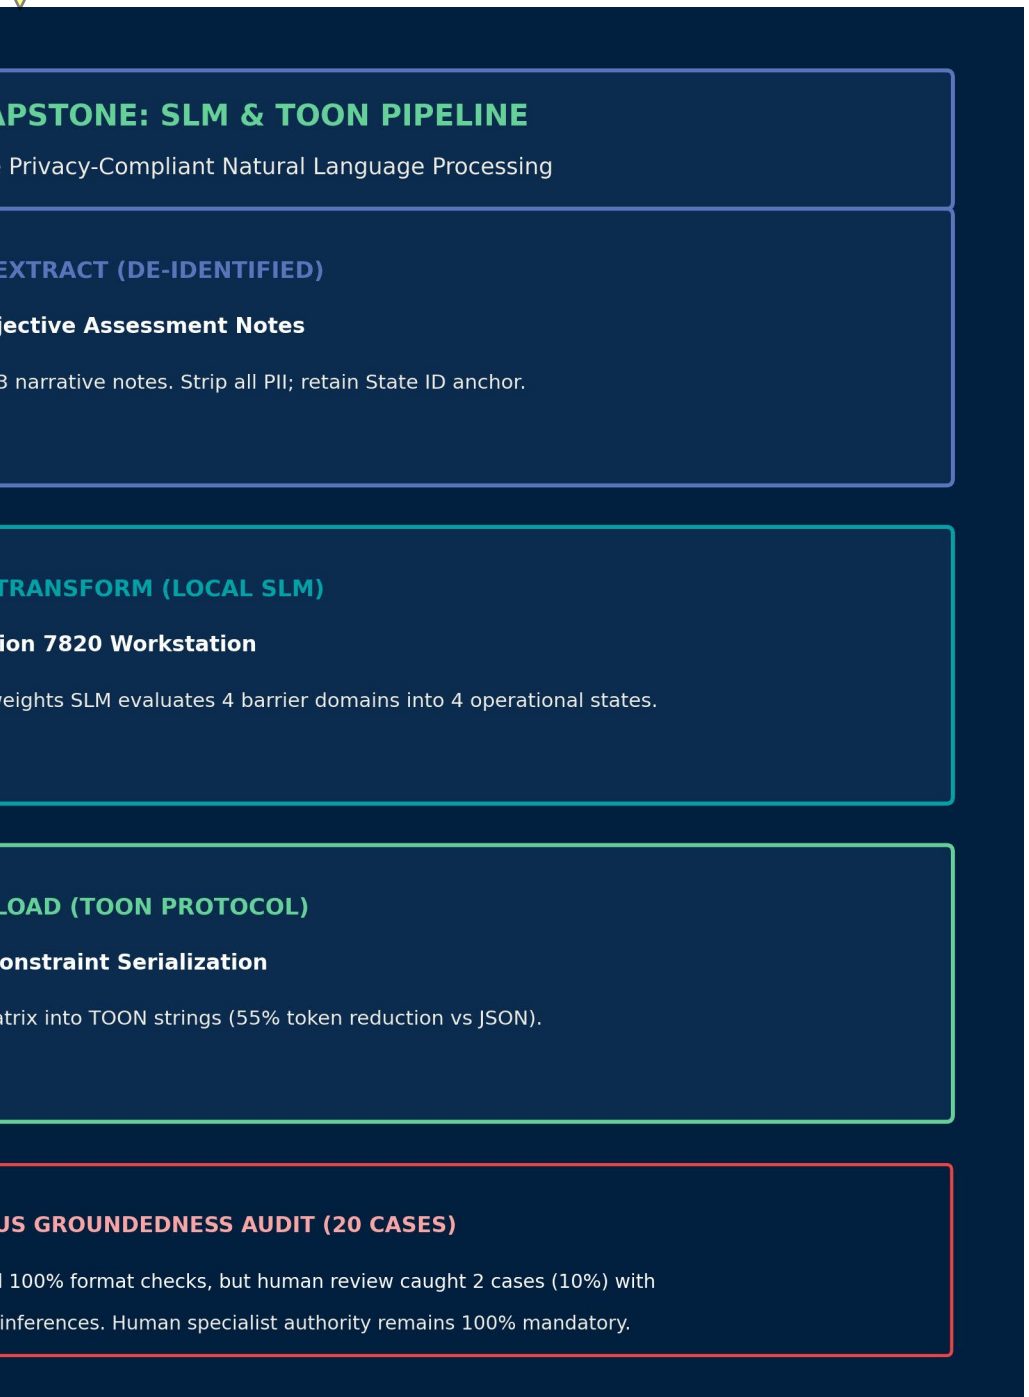

- **Condition:** Work-ready, but operational constraint applies (bus route stops 21:00).
- **Action:** Target for formal CM enrollment; draft IEP with explicit parameters.

Mitigated

- **Condition:** Barrier exists, but verified workaround active (family ride confirmed).
- **Action:** Immediate referral to LVER for targeted placement within safe bounds.

Resolved

- **Condition:** Past impediment permanently cleared (signed 6-month lease).
- **Action:** Archive barrier from active filters; proceed with standard job search.

WGU CAPSTONE & USDOL INTEGRATION

Local SLM Synthesis & TOON Ingestion

- **Extract Standard Notes:** Base-package GeoSol exports pull de-identified narrative assessment text with zero real veteran PII.
- **Transform via Local SLM:** Dell Precision 7820 workstation processes notes on-premise using an open-weights model with zero API costs.
- **Load TOON Constraints:** Slashes token overhead by 55%, serializing filters like [Shift End < 2030 hrs] directly into VOMA and Cloud Excel.

Architecture: On-Premise Small Language Model Pre-Processing

TEWIDE IMPLEMENTATION ROADMAP

hased Rollout & Frontline Governance

Workforce Alabama

hase 1 & 2 Pilot

- **Mobile Prototype:** Live validation of our 48 Non-CM veterans on local M365 SharePoint tracker.
- **Regional Pilot:** Expand dual-report join and LVER handoffs across SWAPTE Region 7 Career Centers.

Phase 3 & 4 Scale

- **Statewide Rollout:** Deploy across all 7 Alabama LWDBs (~1,200+ veterans) via NeoGov Data Coordinator role.
- **USDOL VOMA Link:** Serialize validated TOON constraints into national career matching engine.

Frontline Governance

- **Specialist Rulebook:** JVSG Data Quality Working Group standardizes statewide barrier classifications.
- **Synthetic Baselines:** Evaluate 20 synthetic scenarios with zero live PII to achieve consensus definitions.
